

## Proposed Chemical Use in Summer 2018/2019

The following coupes are being monitored for potential insect control in 2018/19 and therefore may have a chemical application between November 2018 and February 2019.

To easily view the location of these coupes, please use the interactive map viewer <https://www.sttas.com.au/forest-operations-management/interactive-map-viewer> and select from the menu for Potential Chemical Application Summer.
