

Forest Nursery Seedling Price List 2018 (Jan 2018)

The Sustainable Timber Tasmania nursery produces plantation seedlings from seed orchard seed, and seedlings for revegetation, shelter belt & general purpose from wild & provenance collected seed. Contract growing of other species can be arranged.

Pinus radiata (Radiata Pine)

A dense moderate sized tree of conical form. Introduced from California it is a successful plantation and shelterbelt tree. Tolerates a wide range of conditions, but requires well-drained soil.
Height 15—30+m

Acacia melanoxylon (Tasmanian Blackwood)

A dense hardy moderate sized tree. Tolerates a variety of sites, but prefers moist well-drained soil, with cool climatic conditions. Suitable for shelter, shade or as a specimen tree.
Height : 5 to 25m

Eucalyptus nitens (Shining Gum)

Fast growing tall timber tree suited to cooler high altitude climates and tolerating cold conditions.
Height 30—50m

Eucalyptus globulus (Tasmanian Blue Gum)

A fast growing tree, hardy to frosts once established. Prefers a sunny moist but well -drained position. Widespread in the south east of Tasmania, the east coast and Bass Strait islands.
Height to 90m

Other species may be available Spring 2018, to enquire about availability of these please contact us between August to September, 2018.
